DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-23 & 29-40, drawn to methods of stabilizing a neural cell.

Group II, claim(s) 24-26 & 41-43, drawn to methods of differentiating neural cells to TH-positive neurons.

Group III, claim(s) 27 & 44, drawn to methods of differentiating neural cells to glutamate decarboxylase –positive neurons.

Group IV, claim(s) 28 & 45, drawn to methods of differentiating neural cells to GFAP glial cells.

Group V, claim(s) 46-55, drawn multipotent neural progenitor cell compositions.

2. The inventions listed as Groups I-V do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

Group I is directed to methods of stabilizing a neural cell, which is the first claimed invention. However, because Carpenter et al (US Patent 5,968,829) teach methods of stabilizing

Art Unit: 1649

and proliferating pluripotent mammalian neural progenitor cells, which meets the recited claim limitations, no special technical feature exists for Group I as defined by PCT Rule 13.2, because it does not define a contribution over the prior art. Group V is drawn to a structurally different product, which does not share the same or a corresponding technical feature. The technical features of Groups II-IV are drawn to methods having different goals, method steps and starting materials, which do not require each other for their practice and do not share the same or a corresponding technical feature. Note that PCT Rule 13 does not provide for multiple products or methods within a single application. Because the technical feature of Group I is not a special technical feature, and because the technical features of the Group II-V inventions are not present in the Group I claims, unity of invention is lacking.

3. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
